## 1. ssc\_p (10th Percentage)

Mean = 67.3

Median = 67

Mode = 62

Skew = -0.13 (slightly left skewed)

Kurtosis = -0.60 (flat distribution)

Range: 40.89 to 89.4

### Interpretation:

- Students mostly scored around **67%**.
- Slight left skew → a few students scored high.
- Flat kurtosis → no extreme high or low scores.
- Scores are fairly consistent.

## 2. hsc\_p (12th Percentage)

Mean = 66.33

Median = 65

Skew = +0.162 (slightly right-skewed)

Kurtosis = +0.086 (near normal)

Range: 42.75 to 91.15

### Interpretation:

- Most students scored around **65–66%**.
- Slight right skew → more students scored on the lower side.
- Nearly normal distribution.
- No extreme variations.

## 3. degree\_p (Degree Percentage)

Mean = 66.35

Median = 66

Skew = +0.204 (mild right skew)

Kurtosis = -0.097 (near normal)

Range: 50 to 88.5

### Interpretation:

- Central score is around **66%**.
  - Mild right skew → more students scored in the lower range.
  - Almost normal → balanced spread.
- Degree marks are quite stable and consistent.

## 4. etest\_p (Employment Test Percentage)

Mean = 72.1

Median = 71

Skew = +0.282 (right skew)

Kurtosis = -1.088 (very flat)

Range: 50 to 98

### Interpretation:

- Most candidates scored around **71–72%**.
- Clear right skew → many scored low, few high performers.
- Very flat → broad spread, no sharp peak.
- Indicates diverse performance levels in the test.

## 5. mba\_p (MBA Percentage)

Mean = 62.27

Median = 62

Skew = +0.313 (moderate right skew)

Kurtosis = -0.47 (flat)

Range: 51.21 to 77.89

### Interpretation:

- MBA scores centered around **62%**.
- More students got lower marks than higher marks.
- Slightly flat → marks are spread out.
- Variation is moderate.

## 6. salary

Mean = 277,648

Median = 265,000

Mode = 300,000

Skew = +0.8067 (strong right skew)

Kurtosis = -0.239 (slightly flat)

Range: 200,000 to 390,000

### Interpretation:

- Most common salary = **300,000**
- Median lower than mode → distribution pulled to right
- Strong right skew →
  - Many candidates earn lower salaries
  - Few candidates earn higher salaries (pulling right tail)
- Flat → salaries are spread, not concentrated.
